

Career Objective

An ambitious, people orientated person with over one year of professional experience and a Bachelor of Information Technology from Melbourne Polytechnic. With a high academic average and a passion for working on complex and engaging projects to constantly challenge my expertise. It's an ambition of mine to work towards becoming the finest programmer possible. My critical problem-solving skills are well developed and help me deliver new perspectives and solutions to the challenges that I encounter.

Technical Skills

Programming Languages:	JavaScript (Node.js Vue.js jQuery) CSS3 (SCSS, Bootstrap) HTML5 PHP TypeScript
Database Systems:	MySQL MongoDB (Mongoose ODM) Oracle SQL
Development Tools:	Ajax Axios Nuxt.js Webpack AWS (EC2, Elastic Beanstalk, S3) MongoDB Atlas Git GitHub WordPress GraphQL Nginx RESTful API Travis CI GH Pages PWA Service Workers
Computer Software:	Visual Studio Code Photoshop FileZilla Postman
Operating Systems:	Windows Linux (Ubuntu) macOS
Visual Modelling:	Activity Diagram Workflow Diagram Sitemap Diagram Process Flow Diagram SWOT analysis Flow Chart Use Case Diagram
Testing:	System integration testing User acceptance
Development Skills:	REST API Design User Experience Design (UI, UX, Prototyping) Relational Database System Development Non-Relational Database System Development
Spoken Languages:	Bilingual fluency (written and spoken) in Polish (native) and English (PTE av. 90), basic German

Professional Experience

Application Developer and Programmer

July 2018 - Present

Your Local Plumbing Group Melbourne

Responsibilities

- Help in conceptualising and developing applications throughout the SDLC
- Work closely with department managers across the company in evaluating current systems and processes, to identify shortcomings and limitations.
- Gather data for system analysis to determine program needs and requirements.
- Work within the development team to research and choose tools and technologies to best fit specifications and requirements for software builds.
- Contribute writing and building software as well as web-based applications ranging from database analysis and development, backend/frontend design and development.
- Improvise and maintain existing systems and necessary documentation, follow testing procedures, perform regular bug diagnosis and debugging to assure the build quality and usability.
- Direct software purchases and further subscriptions.
- Educate and train end-users by providing technical and detailed documentations, user manuals and operational procedures.

Education

Bachelor of Information Technology

July 2015 – July 2018

Melbourne Polytechnic

Achievements – average of HD, multiple letters of commendations (available to view on LinkedIn).

University Projects

IMgateway Consumer Application

July 2017 - May 2018

Melbourne Polytechnic, Melbourne

- Objective:** Prepare project proposal, followed by the prototype application for Unity Health.
- Tools:** JavaScript (jQuery), HTML5, CSS3, Microsoft Office Suite.
- Duties:** Deliver high-quality project proposal. Create and design wireframes, storyboards and site maps. Develop and test a prototype application.
- Outcome:** Both parties - Melbourne Polytechnic and Unity Health were fully satisfied with the final prototype that we have developed and presented.
- Result:** Obtained High Distinction mark for this project and lots of gratitude for representing Melbourne Polytechnic.

Personal Attributes

Focused **time management** skill developed while working a part-time job, delivering high-quality work in the university, completing multiple web/software development online courses simultaneously.

Strong **eye for detail** improved over time by working on different types of projects from scratch where little error rate was crucial.

Highly **self-motivated**, following a “slight edge” approach in life where the regular progression compounds over time.

Finely honed sense of **punctuality** as demonstrated through always presenting myself on time for the scheduled meetings (both professional and personal), and successfully meeting study and employment responsibilities.

Interests

- Electronic music production using FL Studio software and mixing music, mostly interested in deep and progressive house/trance.
- Keen interest in psychology and philosophy, one might say that I have obtained a “psychological degree on YouTube”.
- Passionate about technology and innovations, completing online courses and challenges in my spare time.

Online Presence
